SUMMARY

By the start of 2022, most government-imposed COVID-19 had been lifted and travel between most locations within Australia and New Zealand had returned to “normal”. Although international travel had returned getting too many Asian ART units remained problematic with some still being closed or offering only limited services. By the close of 2021, all the audits in Australia and New Zealand are now up to date, however many audits for Asian units remain postponed.

1. INTRODUCTION

The Reproductive Technology Accreditation Committee (RTAC) was formed in 1987 and is a sub-committee of the Fertility Society of Australia and New Zealand (FSANZ) reporting to the FSANZ Board. RTAC issues licences to ART Units that comply with the Code of Practice. The Australian and New Zealand Code was first introduced in 1986 when the FSANZ produced a series of standards as a guide for ART Units. This initial code was revised in 1992, 1997, 2001 and 2005. It was fully rewritten in 2008 with further revisions in 2010, 2014, 2017 and 2021. An International Edition of the Code of Practice was introduced in 2014 to facilitate its application in countries outside the jurisdiction of the regulatory laws of Australia and New Zealand, and this was revised in 2018. The purpose of both RTAC Codes of Practice is to:

- a) Promote continuous improvement in the quality of care offered to people accessing fertility treatment.
- b) Provide a framework and set criteria for the auditing process that leads to accreditation of organisations that deliver fertility services.
- c) Ensure the auditing process is carried out in an independent, non-adversarial and constructive manner.

2. AUDIT AND LICENSING OF ART UNITS

An ART Unit is defined as being a facility with a laboratory collecting or preparing human gametes and/or embryos for therapeutic service, possibly across a range of sites of clinical activity. All ART Units in Australia and New Zealand were audited against the RTAC Code of Practice (2017) by auditors from the Certifying Bodies (CBs). In addition to the RTAC audit, some ART Units chose to have a simultaneous audit against the standard ISO9001, and all Units in New Zealand are audited for compliance with the New Zealand Ministry of Health NZ8181 Guidelines.

Audits undertaken are classified as:

- a) Stage 2 audit. An audit for a new Unit.
- b) Surveillance audit. A routine audit is undertaken annually. These audits have a three-year cycle with Critical Criteria from the Code of Practice reviewed annually, and Good Practice Criteria once in the cycle. The only exception to this are Units in Singapore where local legislation requires a surveillance audit every two years all with all Criteria to be reviewed.
- c) Relocation audit. This is a special audit where a Unit has relocated.
- d) Follow-up audit. Where a licence was issued for a reduced time due to a significant non-conformity, and the purpose is to confirm the Unit is now compliant.

The accreditation process is:

1. A visit by one or two auditors from a CB depending on the size of the Unit, and a review to confirm compliance with the Code of Practice. Once any non-conformities have been resolved, the CB can then issue a Certificate confirming compliance and a recommendation to RTAC to issue a licence.
2. Review of the Certification report by the RTAC Chair and a decision made to issue the licence or not.

Key personnel listed are those in post at the time of the audit and staff changes may therefore have changed since then. The report uses the position titles given in the RTAC Codes of Practice to indicate the levels of responsibility. However, Units are entitled to use their staff titles where they prefer.

Certifying Bodies

Two certifying bodies currently undertake audits of ART Units both in Australia and New Zealand and Units outside of these countries. They are:

1. DNVGL (<https://www.dnvgl.com/>), and
2. Global-Mark (<https://www.global-mark.com.au/>).

Both CBs are audited and approved by the agency JAS-ANZ (<http://www.jas-anz.com.au/>)

Australia and New Zealand ART units

The ART Units audited during the period 1st July 2021 to 30th June 2022 against the Australian and New Zealand Code of Practice (2021) are listed in Appendix 1 according to their location, namely Australian Capital Territory (Table 1), New South Wales (Table 2), New Zealand (Table 3), Northern Territory (Table 4), Queensland (Table 5), South Australia (Table 6), Tasmania (Table 7), Victoria (Table 8) and Western Australia (Table 9). All Units are audited annually, with Critical Criteria audited annually and Good Practice Criteria in a three-year cycle.

International ART units

The ART Units audited during the period 1st July 2021 to 30th June 2022 against the International RTAC Code of Practice (2018) are listed in Appendix 2 according to their location, namely China (Table 10), Indonesia (Table 11), Malaysia (Table 12), Singapore (Table 13), Thailand (Table 14), and Vietnam (Table 15). Note that Units are audited annually (Critical Criteria annually and Good Practice Criteria in a three-year cycle) except for Singapore where local legislation requires bi-annual audits, and so all audits in Singapore are against all criteria of the International Code of Practice.

Impact of COVID -19

On the 22nd of April 2020, RTAC issued Technical Bulletin 12 advising on the reopening of IVF services throughout Australia and on the 6th of October 2020 RTAC issued another statement advising that the Audit process would restart throughout Australia and overseas in January 2021. This audit process will now include remote auditing where onsite attendance by an auditor is not possible due to government-mandated COVID-19 restrictions. Both audit groups had advised RTAC that they would be able to audit remotely from January 2021. All the required audits for Australian and New Zealand clinics had been undertaken by the end of this reporting period. Some Asian clinics requested and were granted a further postponement of their audits as their Unit was either still closed or operating a limited service only. Some Units especially in China may allow their license to lapse.

A total of 112 audits were carried out in the period from the 1st of July 2021 to the 30th of June 2022. Chart 1 shows the monthly breakdown of the audits.

Number of Audits per month
1st July 2021 to 30th June 2022

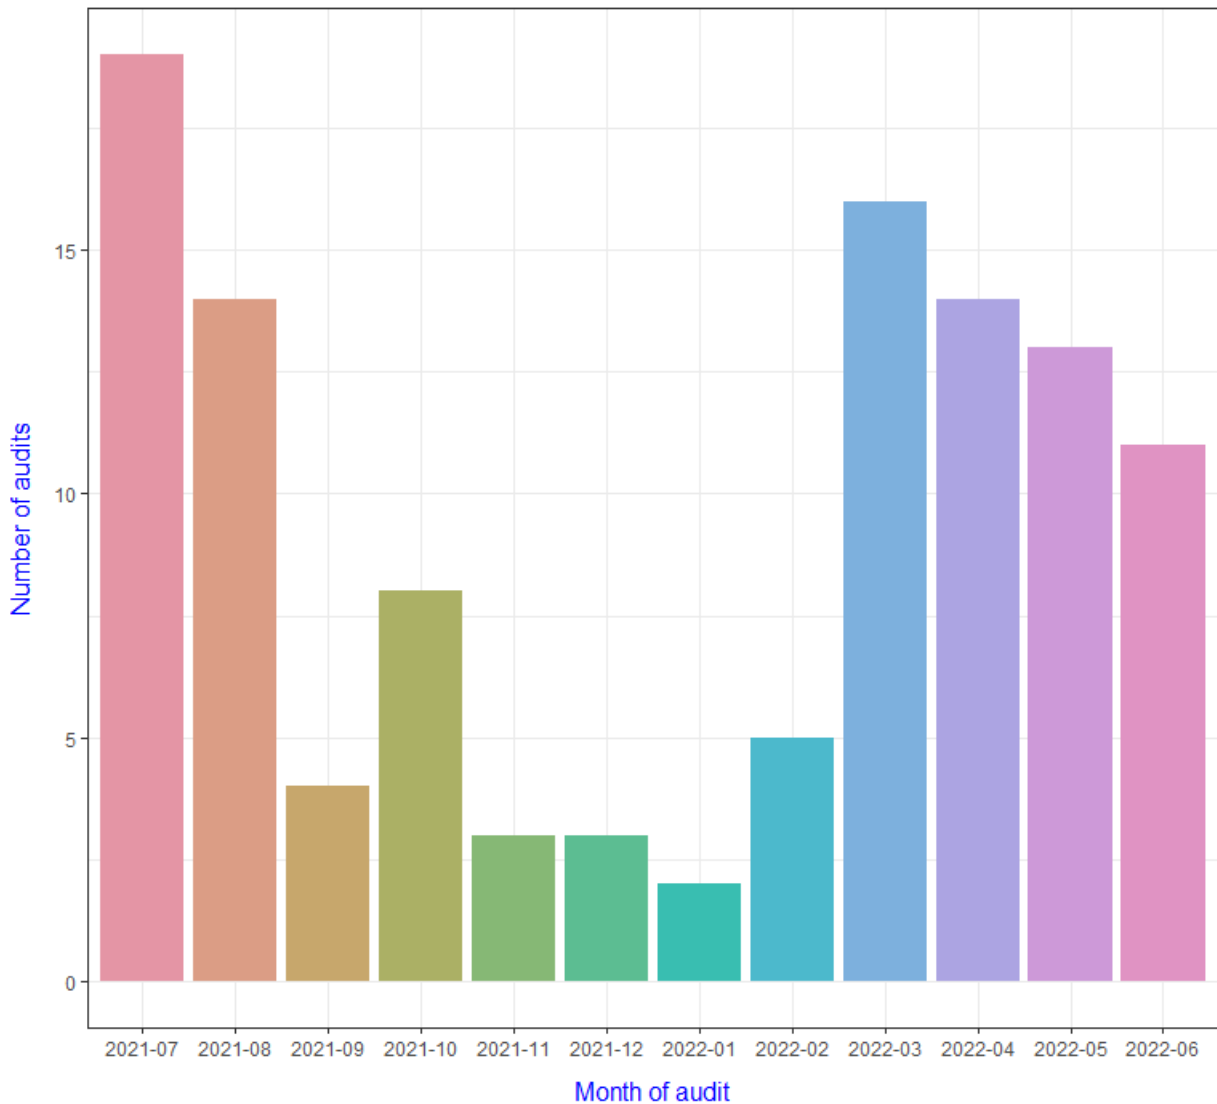

Chart 1: Monthly Audits

A breakdown of the audits is shown in Tables 1 and 2. Overall half the audits carried out in this reporting period were conducted offsite. Nealy all Asian audits were offsite and most New Zealand audits were also offsite. The auditors continue to report that the offsite audit is successful and has been especially useful for those units located outside of Australia as both audit groups are domiciled in Australia.

Due to changes to scheme rules which were effective from January 2020 major Non-Conformances (NCR) were reportable during an audit. These major NCRs were rectifiable within 30 days and this was achieved in all cases. There were far fewer major NCRs reported in this reporting period than in the previous period. The auditors had reported that most of the major NCRs are long-standing and the change to the scheme rules allowing them to be reported and be actionable before a license could be renewed has spurred Units into making the necessary changes to their procedures and policies instead of just applying lip service to the issue. We expect to see even fewer in the next reporting period.

Table 1: Audit breakdown (offsite/onsite)

	Number audits	Total NCR	Average NCR	Major NCR
<i>Australia</i>	84	145	1.73	9
<i>New Zealand</i>	9	56	6.22	0
<i>International</i>	19	28	1.47	1
<i>Total</i>	112	229	2.04	10

Table 2: Audit breakdown (NCRs)

	Number audits	Offsite	Onsite	Ratio
<i>Australia</i>	84	35	49	41.7%
<i>New Zealand</i>	9	6	3	66.7%
<i>International</i>	19	18	1	94.7%
<i>Total</i>	112	59	53	52.7%

Table 3 shows the breakdown of license periods. A period of 0 months is associated with a major NCR and a license cannot be reissued until the NCR has been rectified. If the NCR cannot be rectified before the nominal license expiry then the license is lost. In all cases, major NCRs were rectified satisfactorily before the nominal license expiry and were renewed. A 12-month license is normal and for some Asian units, 24 months is normal (see above). A 6-month license is granted where it was felt that an issue had been identified and follow-up was required much sooner than the normal 12-month period. One license was suspended in an Asian unit as they were unable to comply with the international code of practice. There were two 3 month licenses granted in a situation where sooner follow-up for a major NCR was thought appropriate. The other category is Audits where a license was not issued such as stage 1 audits (new clinics) or audits of egg collection facilities that are separate to the main laboratory.

Table 3: Audit licenses.

<i>License</i>	<i>Number</i>
<i>0 months</i>	2
<i>3 months</i>	2
<i>6 months</i>	11
<i>12 months</i>	86

3. ADMINISTRATION OF RTAC

RTAC is comprised of a Chair appointed by the FSANZ Board, and members nominated by the various professional groups within the FSANZ together with a nominee of ACCESS (a not-for-profit, consumer-controlled, independent sector organisation). It is supported by the FSANZ Secretariat, Ms Kim O’Dea.

RTAC Chair

The Chair during 2021-2022 was Dr Chris Copeland who was appointed on the 16th of September 2019. The position has a term of three years and this expires in September 2022. Due to the COVID pandemic and its ongoing consequences, it was agreed that the appointment would be extended for a further 3 years until September 2025.

RTAC members

The members of RTAC were:

- Dr Anne Clark – Deputy Chair and Nominee of the IVF Directors Subcommittee of the FSANZ.
- Ms Antonia Clissa – Nominee of the Australian and New Zealand Infertility Counsellors Association (ANZICA).
- Dr Petra Wale – Nominee of Scientists in Reproductive Technology (SIRT).
- Ms Chloe Ashton – Nominee of Fertility Nurses of Australasia (FNA).
- Ms Maree Pickens - Nominee of ACCESS.

Meetings

Due to the COVID-19 restrictions, no face-to-face meetings of the RTAC committee in 2021, however, two face- face meetings have been held in 2022. The committee has met online once.

The RTAC Chair attended three online meetings and one face-to-face meeting of the FSANZ Board during the year.

Review of the RTAC Code of Practice (COP)

A review of the COP was last carried out in 2017 and the next review was scheduled for 2020. Notification of this review was circulated in November 2019 requesting submissions to be made no later than the 28th of February 2020 so that the review could be completed and a completed document made available for the scheduled FSANZ conference in August 2020. With the advent of the COVID-19 pandemic, the FSANZ conference was cancelled and the review was postponed indefinitely pending the outcome of the pandemic. As the COVID situation has improved the review was restarted on the 1st of October 2020. A final draft was submitted to the Board for consideration in October 2021 and this draft was approved and came into effect in January 2022. The major updates to this version of the COP are listed below

- ✚ **General changes:** There are growing jurisdiction differences between Australia and New Zealand, and where those differences exist, the CoP now clearly separates what is expected of an Australian or New Zealand-based ART unit. These changes occur mainly in the Introduction.
There has been a general improvement in spelling, grammar and punctuation within the document.

- ✦ **Section 1.2:** There have been small changes in this section that seeks to clarify the CoP, see section 1.2 b), e), and g). In section 1.2 h) there is now a requirement for the Unit to have a designated Quality Coordinator/Manager.
- ✦ **Section 1.3:** There have been changes made to the educational requirements for the Scientific Director and the Counselling Manager.
- ✦ **Section 1.4:** There have been changes made to the educational requirements of the Clinical Director, Laboratory Manager and Counsellor. Section 1.4.3 has been revised to clarify the role of other key personnel in the absence of key personnel.
- ✦ **Section 2.2** has been added requiring Units to comply with open disclosure standards as they apply in Australia or New Zealand.
- ✦ **Section 2.2.3** has been updated to now include references to the YourIVFSuccess website and how it may be used by clinics in their advertising.
- ✦ **Section 2.3** has been extensively revised to clarify the consenting process and the use of interpreters.
- ✦ **Section 2.9** has been extensively revised and now includes a section covering the transport of cryostored material.
- ✦ **Sections 3.1 and 3.2:** These sections have been extensively revised to clarify what constitutes an adverse event and when and how it should be reported. These changes are expected to resolve the large underreporting of adverse events in the past and bring the reporting into line with State expectations. Attachment 1 for reporting adverse events has also been revised with a review to a change to an online reporting model in the future.
- ✦ **Section 4:** There are some minor definitional changes here that clarify ART organisations and Units. A definition of a health care interpreter has been added and the definitions of OHSS have been revised.

Submission of reports to RTAC

Audit reports, adverse event reports, patient complaints etc have always been sent as email attachments to the secretariate and onto the RTAC chair. This is an inherently insecure method of communication. These email communications are not encrypted and are vulnerable to potential hackers. In 2020 RTAC has established a secure dropbox account for reports to be sent to the RTAC chair. This process is working well with the added advantage that comments are now associated with the document in question and not with a convoluted email train. The next step is to make this available to the CBs so that can post an audit report directly onto the website.

Review of RTAC documentation.

No documents are scheduled for review in the current reporting period.
