## SUMMARY

The audit process has resumed its regular operations following several years of disruption caused by the COVID-19 crisis. Amidst the challenges, three international units withdrew from the iCOP due to pandemic-related disruptions. However, four new international units have undergone assessment and have been granted licenses. In the Australia/New Zealand region, there have been changes with the closure of two units and the opening of three new units.

The iCOP has undergone a thorough review and received approval. The revised version is scheduled to take effect in January 2024. Additionally, a review of the COP is currently in progress and is expected to be completed by June 2024.

## 1. INTRODUCTION

The Reproductive Technology Accreditation Committee (RTAC) was formed in 1987 and is a sub-committee of the Fertility Society of Australia and New Zealand (FSANZ) reporting to the FSANZ Board. RTAC issues licences to ART Units that comply with the Code of Practice. The Australian and New Zealand Code was first introduced in 1986 when the FSANZ produced a series of standards as a guide for ART Units. This initial code was revised in 1992, 1997, 2001 and 2005. It was fully rewritten in 2008 with further revisions in 2010, 2014, 2017 and 2021. An International Edition of the Code of Practice was introduced in 2014 to facilitate its application in countries outside the jurisdiction of the regulatory laws of Australia and New Zealand, and this was revised in 2023. The purpose of both RTAC Codes of Practice is to:

- a) Promote continuous improvement in the quality of care offered to people accessing fertility treatment.
- b) Provide a framework and set criteria for the auditing process that leads to accreditation of organisations that deliver fertility services.
- c) Ensure the auditing process is carried out in an independent, non-adversarial and constructive manner.

## 2. AUDIT AND LICENSING OF ART UNITS

An ART Unit is defined as being a facility with a laboratory collecting or preparing human gametes and/or embryos for therapeutic service, possibly across a range of sites of clinical activity. All ART Units in Australia and New Zealand were audited against the RTAC Code of Practice (2021) by auditors from the Certifying Bodies (CBs). In addition to the RTAC audit, some ART Units chose to have a simultaneous audit against the standard ISO9001, and all Units in New Zealand are audited for compliance with the New Zealand Ministry of Health NZ8181 Guidelines.

Audits undertaken are classified as:

- a) Stage 1 audit. An audit for a new unit and a license is not issued.
- b) Stage 2 audit. An audit for a new Unit.
- c) Surveillance audit. A routine audit is undertaken annually. These audits have a three-year cycle with Critical Criteria from the Code of Practice reviewed annually, and Good Practice Criteria once in the cycle. The only exception to this is Units in Singapore where local legislation requires a surveillance audit every two years with all Criteria to be reviewed.
- d) Relocation audit. This is a special audit where a Unit has relocated.
- e) Follow-up audit. Where a licence was issued for a reduced time due to a significant non-conformity, and the purpose is to confirm the Unit is now compliant.

The accreditation process is:

1. A visit by one or two auditors from a CB depending on the size of the Unit, and a review to confirm compliance with the Code of Practice. Once any non-conformities have been resolved, the CB can then issue a Certificate confirming compliance and a recommendation to RTAC to issue a licence.
2. Review of the Certification report by the RTAC Chair and a decision made to issue the licence or not.

Key personnel listed are those in post at the time of the audit and staff changes may therefore have changed since then. The report uses the position titles given in the RTAC Codes of Practice to indicate the levels of responsibility. However, Units are entitled to use their staff titles where they prefer.

## Certifying Bodies

Two certifying bodies currently undertake audits of ART Units both in Australia and New Zealand and Units outside of these countries. They are:

1. Certified Partner Global (<https://cpg.global>)
2. Global-Mark (<https://www.global-mark.com.au/>)

Both CBs are audited and approved by the agency JAS-ANZ (<http://www.jas-anz.com.au/>)

DNVGL have withdrawn as a CB for the RTAC Code of Practice. The audit work they previously carried out has been taken up by the two companies above.

## Australia and New Zealand ART units

The ART Units audited during the period 1<sup>st</sup> July 2022 to 30<sup>th</sup> June 2023 against the Australian and New Zealand Code of Practice (2021) are listed in Appendix 1 according to their location, namely Australian Capital Territory (Table 1), New South Wales (Table 2), New Zealand (Table 3), Northern Territory (Table 4), Queensland (Table 5), South Australia (Table 6), Tasmania (Table 7), Victoria (Table 8) and Western Australia (Table 9). All Units are audited annually, with Critical Criteria audited annually and Good Practice Criteria in a three-year cycle.

## International ART units

The ART Units audited during the period 1<sup>st</sup> July 2022 to 30<sup>th</sup> June 2023 against the International RTAC Code of Practice (2018) are listed in Appendix 2 according to their location, namely China (Table 10), Indonesia (Table 11), Malaysia (Table 12), Singapore (Table 13), Thailand (Table 14), and Vietnam (Table 15). Note that Units are audited annually (Critical Criteria annually and Good Practice Criteria in a three-year cycle) except for Singapore where local legislation requires bi-annual audits, and so all audits in Singapore are against all criteria of the International Code of Practice.

## Audits

All the required audits for Australian and New Zealand clinics had been undertaken by the end of this reporting period. Some Asian clinics requested and were granted a further postponement of their audits as their Unit was either still closed or operating a limited service only. A further three international units have withdrawn from the RTAC international scheme, but 4 new international Units have been granted licenses Units.

In Australia and New Zealand, 2 Units have closed or amalgamated with other Units and 3 new Units have been granted licenses.

A total of **117** audits were carried out in the period from the 1<sup>st</sup> of July 2022 to the 30<sup>th</sup> of June 2023. Chart 1 shows the monthly breakdown of the audits. Table 1 shows the number of licenses, and this is greater than the number of audits even though all the required audits have been completed. This discrepancy is due to

- a) Audit timing. For example, there are 6 NZ licenses but only 3 audits. The NZ audits occur in early July and in this period 3 were performed in late June 2022 and 3 in early July. All 6 were done in early July 2023.

- b) Satellite Units are not audited annually.
- c) Some Asian units have requested postponement of their audits.
- d) This figure in Table 1 is for now and this includes new Units that were not around in the current period.

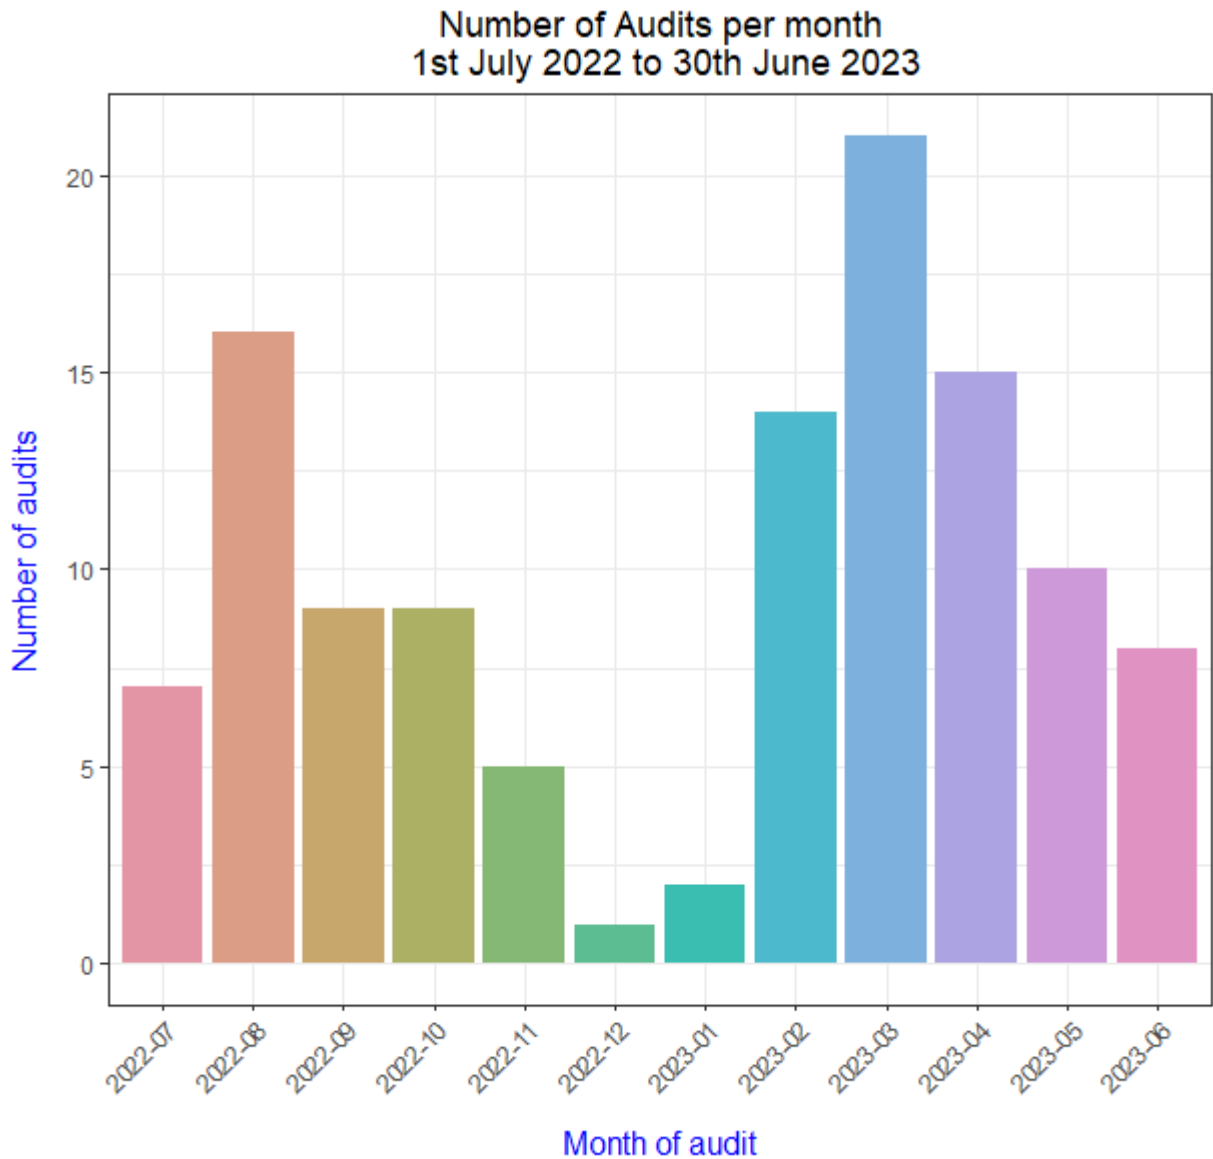

Chart 1: Monthly Audits

A breakdown of the audits is shown in Tables 1 and 2. Only 5% of Audits carried out in this reporting period were conducted offsite (Nealy 50% in the previous reporting period). The auditors continue to report that the offsite audit is successful and has been especially useful for those units located outside of Australia as both audit groups are domiciled in Australia.

Due to changes to scheme rules which were effective from January 2020 major Non-Conformances (NCR) were reportable during an audit. These major NCRs were rectifiable within 30 days, and this was achieved in all cases. There were far fewer major NCRs reported in this reporting period than in the previous period.

**Table 1: Audit breakdown (offsite/onsite)**

	Number licenses	Number audits	Total NCR	Average NCR	Major NCR
<i>Australia</i>	97	84	164	1.95	1
<i>New Zealand</i>	6	3	15	5.00	0
<i>International</i>	41	30	68	2.27	0
<i>Total</i>	144	117	247	2.11	1

**Table 2: Audit breakdown (NCRs)**

	Number audits	Offsite	Onsite	Ratio
<i>Australia</i>	84	1	83	1.19%
<i>New Zealand</i>	3	0	3	0.0%
<i>International</i>	30	5	25	16.7%
<i>Total</i>	117	6	111	5.12%

**Regarding License Periods (table 3):**

- A license period of 0 months is tied to a major Non-Conformance Report (NCR), a licence cannot be reissued until the NCR is resolved. If the NCR persists beyond the nominal license expiry, the license is forfeited. Notably, all instances of major NCRs were successfully rectified before the nominal license expiry, resulting in license renewals.
- In addition 0-month audits are conducted in conjunction with Stage 1 audits and relocation audits. Table 3 illustrates that out of 6 audits conducted over 0 months, 4 were Stage 1 audits, 1 was a relocation audit, and 1 involved a major NCR.
- For new units, a 6-month license is initially granted. Routine follow-ups occur at the 6-month mark, or sooner if an identified issue necessitates prompt attention before the standard 12-month period. Typically, a 12-month license is standard, but certain Asian Units, specifically in Singapore, adhere to a 24-month norm.
- In the category of audits where a license is not issued, instances include Stage 1 audits for new clinics and audits of egg collection facilities separate from the main laboratory.

**Table 3: Audit licenses.**

<i>License</i>	<i>Number</i>
<i>0 months</i>	6
<i>3 months</i>	0
<i>6 months</i>	15
<i>12 months</i>	91
<i>24 months</i>	2

<i>Total</i>	117

Table 4 shows the breakdown of the areas of the COP (Australia and New Zealand only) with the number of NCRs raised against the COP major section.

The highlighted rows represent the areas of concern, and these are Quality Management, Personnel, Medication management, Identification & Traceability, and the reporting of Adverse Events. These areas will come under scrutiny in the current COP review.

### 3. ADMINISTRATION OF RTAC

RTAC is comprised of a Chair appointed by the FSANZ Board, and members nominated by the various professional groups within the FSANZ together with a nominee of ACCESS (a not-for-profit, consumer-controlled, independent sector organisation). It is supported by the FSANZ Secretariat, Ms Kim O’Dea.

#### RTAC Chair

The Chair during 2022-2023 was Dr Chris Copeland who was appointed on the 16<sup>th</sup> of September 2019. The position has a term of three years, and this expired in September 2022. Due to the COVID pandemic and its ongoing consequences, it was agreed that the appointment would be extended for a further 3 years until September 2025.

#### RTAC members

The members of RTAC were:

- Hamish Barblett – Deputy Chair Appointed by FSANZ Board
- Dr Anne Clark – Nominee of the IVF Directors Subcommittee of the FSANZ.
- Ms Antonia Clissa – Nominee of the Australian and New Zealand Infertility Counsellors Association (ANZICA).
- Dr Yanhe Lui – Nominee of Scientists in Reproductive Technology (SIRT).
- Ms Linda Robinson – Nominee of Fertility Nurses of Australasia (FNA).
- Ms Maree Pickens - Nominee of ACCESS

#### Meetings

Two face- face meetings have been held in 2022\_2023. The committee has met online once.

The RTAC Chair attended three online meetings and one face-to-face meeting of the FSANZ Board during the year.

#### Review of the International RTAC Code of Practice (iCOP)

A review of the iCOP was last carried out in 2021 and the next review was scheduled for 2023. Notification of this review was circulated in November 2022 requesting submissions to be made no later than the 28<sup>th</sup> of February 2023 so that the review could be completed, and a completed document made available for the scheduled FSANZ conference in June 2023. A final draft was submitted to the Board for consideration in October 2023 and this draft was approved and will come into effect in January 2024. The major updates to this version of the COP are listed below.

1. CC9. Adverse events: A list of Adverse Events has been included outlining the action required by the unit in each instance.
2. Attachment 1 - Donor & Surrogacy Requirements: A "Donor - Recipient Counselling Checklist" has been added detailing the requirements of implications counselling prior to commencing treatment.
3. Attachment 3 - Adverse Events Reporting: The submission template has been updated to bring it into line with the ANZ COP.

4. Attachment 4 - Best Practice Recommendations: This (new) section has been included at the suggestion of the Certifying Bodies and has been designed to adopt the role of the "technical bulletin" issued under the ANZ CoP and are not auditable. Units will be encouraged to adopt these recommendations over the next few auditing periods, with the goal of potentially including them as auditable requirements in future versions of the iCOP.

### Review of the Code of Practice.

A review of the RTAC Code of Practice was commenced in 2023. Submissions have been received and categorized according to theme and COP major section (see Table 4 for a list of the major sections). 67 submissions have been received from 19 individuals or organizations. This represents an estimated engagement rate of 18% which is acceptable as many Units are corporates and 1 submission represents multiple Units. The FSANZ board has also initiated a broad review of the legal framework of the COP. The normal review process is on hold until this board review is complete. It is anticipated the COP review will be completed by June 2024.

### Complaints

Complaints can now be lodged directly with RTAC via the FSANZ website. Six complaints have been lodged in this manner during the period 1-7-2022 to 30-6-2023. All complaints were responded to in an appropriate and timely manner. In four cases there was no further communication once the complaint was received and responded too. In two cases the complaint had been also lodged with the local health authorities and in one case there is also separate litigation under way.

### Review of RTAC documentation.

No documents are scheduled for review in the current reporting period.
